

AZBN52209(siRNA Delivery Peptide)

❖ MOA : Prevent disease-causing mutations of protein by targeted gene inhibition

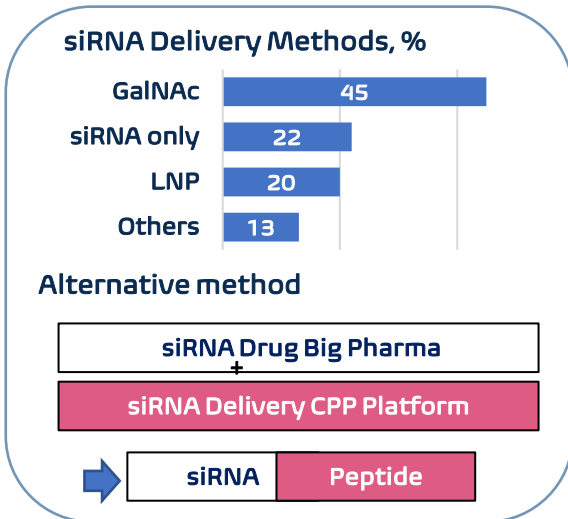

❖ siRNA delivery platform with cell penetrating peptide

LNP (Lipid nanoparticle)	GalNAc receptor	siRNA Delivering CPP Platform
Toxicity	liver hepatocytes only	Less Adverse Effect & other organelles

❖ Leads that can selectively inhibit TRK A

Growth Point 1 siRNA Delivery Platform

Growth Point 2 Therapies & others

- siRNA delivering CPP**
- To**
 - Organs
 - Cells
 - Intracellular Organelles
 - BY**
 - Oral administration
 - Local injection
 - Intravenous injection
 - Others**
 - Anti-aging
 - Hair loss treatment
